

Earth was once small
& one landmass planet

لدى's creation people
once were ONE tribe

Indeed, the ancient young planet earth once was one big landmass small planet. Before sin spill on earth. Long before the land became a divided land. The same for how ٱد's creation people who were once one tribe, one culture, and spoke one language who knew the Creator Father's Name ٱد (which pronounce "YAH"). They became a divided tribe with difference belief, cultures, and languages because they've disobedience ٱد's law, the way of life. They also have had caught blood on their hand and spilled that blood on earth which shakiness and cursed the world.

You might not believe or agree with this, would you think one day our nation would end up divided? Our past ancestor did many times, they have had divided themselves and move along to another land to live in. Because of how variety of people have difference beliefs and wanted to go by their own govern system and the way of life.

We cannot deny that earth was once a beautiful one landmass planet. Now, every continent of the lands around the world are divided each other like a puzzle. Numbers of earthquake history have been recorded shaken the landscape apart. Number of volcanos we also know have been erupted with lava and this can expand to create a new landscape. We also see why we have been seeing down deep below the sea level; a landscape appears with a mark of pattern (like what you see on the left image) are all connected lands from both side all the way up to the soil ground. That is a sign of how the earth has been expanding like a balloon.

People once travel on foot from Africa to America. Here why, there are over 400 pus pyramids discovered around the world. Like there are pyramids in Brazil and El Castillo in Yucatan of Mexico. One famous area of pyramids in Gia of Egypt. Even there are some Pyramids discovered under sea. People far back in those ancient day, built these pyramids. These civilized people who built those pyramids in Brazil and Egypt look. Like why we have seen native Brazilian people who looked like the Asian people in the eastern world? This is the only logical reason why these people once were the same tribal people who've walked a far from their former land, before the land broken apart.

Pyramid of Giza in Egypt

If we study the timeline of the Old Testament (or TANAKH) history, major earthquake was first record during Noah's day and in later time. **אלהים** had to destroy the great evildoer on earth, which HE saved eight people in the ark of huge ship along with list of number of each animal. And the rest on earth were swallowed up in flood (Genesis chapter 6, 7 and 8). There was also other major earthquake record also in the TANAKH. Here are five examples:

- A. 1st Kings 19:11-12
- B. Isaiah 29:6
- C. Ezekiel 38:19
- D. Amos 1:1
- E. Zechariah 14:5

Some of the scripture mentioned about people being swallowed up from the ground, because they were the rebellious people. The earth landscape had shift move and change every time. This is why those who choose not the path of rightness will end up leading to the sin of death. We cannot blame or accuse **אלהים** for their death.

The nature of sin on earth will one day end and be destroyed, once for all time. Satan and the rest of 1/3 of his fellow evil massagers will no longer exist on earth or anywhere in heavens. **אלהים** will purify burn the earth in the last day to renew the heavens and earth. Much difference like how the flood of the Nosh's day happened.

There is another document article that explain a lot more about part of this topic at [a9b19d_1d867b8db5774482bac98b510bc5c76f.pdf \(attest.tv\)](https://www.attest.tv/a9b19d_1d867b8db5774482bac98b510bc5c76f.pdf) . The topic is called “ Earth Do NOT Move & it's NOT Flat”, a 13 pages that explains more detail why the earth dose not cycle around the sun and why it's not flat but a spherical planet.
