

# Logical Truth of the Creator Father

Without the Scripture (or the Bible) evidence to exist, there would not be a Creator Father who made the heavens and Earth. The logical fact here is, that we humans exist because of HIM and HE is the word who started it all. Because he is the word of the law who establish everything, which bring wisdom (Prov. 2, 9:10).

Many people have been debating over this. ***“where did we come from”***? One side claimed about the Big Bang theory and other say it the Creator Father who created us. Still, most people have doubts about the Supreme Creator one who created us.

Here are three logical facts to point out a reasons to think about why we must believe in the heavenly Father, the Creator ONE who created everything.

The first, if we observe the artificial intelligence robot, think about whether we need this artificial intelligence robot or not. There are people out there who do and do not believe we need the artificial intelligence robot in our life.

Second, if we observe the Sun, think about whether we need this Sun or not. There is a very tiny percentage of people who actually guess humans do not required a sun to survive.

The third observed question might trouble you to think and to answer. If we observe the Creator Father who made the heaven and earth, think whether we need this Creator Father or not. High percentages of people who do NOT believe in this Creator Father existence while other do. Still, people struggle to believe.

The reason of all this observable questions, is to notice how the fact can lead to the truth we're not looking at carefully. How lack are we not trusting what is written and what evidence appear in front of our eyes. Instead of rely on theory.

'The Creator' 2023 film created by Gareth Edwards

We as humans are the ones who created this artificial intelligence robot. We cannot deny that humans created this artificial intelligence computer / robot. People believe that artificial intelligence is a need in people's life because it has the potential to improve our lives in countless ways

by solving problems that were once thought impossible. While others believe it's not necessary to have artificial intelligence in our daily life.

So, the point here is, both side CANNOT DENY the existence of artificial intelligence robots was created by man. We mankind are the creator of this artificial intelligence robot. If the world ends up back to the 1600s lifestyle because the world war destroyed everything on earth. People will began forgetting the history of where the tech artificial intelligence robots come from. The young generation will have doubt that mankind was the one who created artificial intelligence robot.

Let's get back to the Sun again, would anyone disagree with the need of the sun in our daily-life? Most percentages of people believe the Sun is very important to us in life. The Sun is an essential component of our solar system and plays a crucial role in sustaining life on Earth. It is our most important source of energy, providing everything we need to support life on Earth. And this, we CANNOT DENY the need of the Sun, such as heat, oxygen, food, and vitamin D are number of example we need in order to survive.

So, the whole logical fact here is, based on the questions, there is someone who is far more intelligent than any mankind who created the artificial intelligence robot. No man had ever able to created something far more advanced in the universe like the sun, earth and beyond. We are depending on this Supreme Creator one who made us, because HE know what is best for us. Like a manual that tell us about the computer or car, to know how to take care and repair. We are way better than these artificial intelligence robots and we CANNOT DENY this truth, that this supreme engineer ONE who created a Sun created us. This ONE is the true invisible Creator existence ONE. He is our Supreme Father.

**HALAUYAH!**
